SUMMARY

Product-minded Frontend Developer (4 y/e) specializing in React, TypeScript, Next.js and React Native. Beyond writing clean code, I focus on architecting scalable applications, optimizing complex state management, and delivering tangible business value. Proven track record of taking ownership of 10+ enterprise-grade projects, driving them from conception to deployment under tight deadlines. Adept at bridging the gap between design and engineering to build high-performance, accessible, and user-centric digital products.

PROFESSIONAL EXPERIENCE

Frontend Developer | Jan 2024 – Present
@Portinos Digital Agency

- Delivered 10+ enterprise client projects on schedule, maintaining a high sprint completion rate by collaborating directly with designers and stakeholders under Agile/Scrum methodologies.
- Reduced application state load times by ~70% by architecting centralized data management solutions with Zustand and integrating REST APIs.
- Improved overall page load speed and rendering efficiency by optimizing component architecture and implementing lazy loading in TypeScript codebases.

Frontend Developer | Mar 2023 – Present
Freelancer

- Increased client site monthly traffic and search visibility by developing SEO-optimized platforms from the ground up using React and Tailwind CSS.
- Engineered diverse, interactive web applications including an Argentinian Fantasy Manager game using Next.js and TypeScript, and a 3D browser game utilizing React Three Fiber.
- Boosted developer productivity by building and publishing a Visual Studio Code extension (Unused Images Finder) utilizing TypeScript and JavaScript.
- Achieved high-efficiency load speeds across all freelance web applications by conducting strict performance audits and component optimization.

Administrative | Jul 2017 – Jan 2024
@Alpha Media Group - Radio Rock & Pop / Splendid AM990 / Rivadavia

- Maintained continuous administrative and operational support across a 6+ year tenure.

KEY SKILLS

– **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
– **Frameworks & Libraries:** React.js, React Native, Next.js, Vue.js, Expo, TanStack Query, Three.js, React Three Fiber, Material-UI, Tailwind CSS, Bootstrap, Sass
– **State Management:** Zustand, Redux, React Context API
– **Tools & Practices:** Git, GitHub, Webpack, RESTful APIs, GraphQL, Jest, React Testing Library, Postman, CI/CD, Agile/Scrum, Figma, Responsive Web Design, SEO Optimization, Accessibility (a11y)
